

We are

a pioneer in long-term preservation technology.

We provide comprehensive support from research and development to maintenance

- ▶ We are a rare company that can provide a complete service from research into preserving the freshness of fruits and vegetables to equipment development, construction, control systems, and maintenance.

Contributing to a sustainable society

- ▶ Long-term preservation reduces food waste and maximizes the supply of harvested goods to the market, supporting food security and the stability of the agriculture and distribution industries.

Keeps fresh food always fresh for a long period of time

- ▶ We have advanced technology that allows us to maintain freshness for more than twice as long as regular refrigeration, and have succeeded in preserving apples for over nine months, ensuring a stable supply throughout the year and contributing to price stability.

Over 41 years of experience and trust

- ▶ With a track record of long-term preservation of hundreds of thousands of tons of fresh food every year, the company is a trusted technology company that holds over 80% of the domestic market share for apples in particular.

Advanced long-term preservation technology and reliable maintenance

- ▶ CA preservation, which adjusts the air density, is the most advanced freshness preservation technology and is safe for the environment and human body. We will build the optimal system to suit the characteristics of fresh food.

Original preservation facilities and systems that enable long-term operation

- ▶ We provide preservation facilities and systems that operate stably for a long period of time from installation. With optimal design, construction, and a unique monitoring system, we ensure quality and operational reliability over the long term.

Fujiplant Co.,Ltd.
SUPPORTING FRESH FOOD WITH
PRESERVATION TECHNOLOGY.

KEEP FRESH YEAR-ROUND.

It will still taste as fresh after 9 months. Japan has some amazing technology!

HP: <https://fujiplant.net/>
LP: <https://fujiplant.jp/>

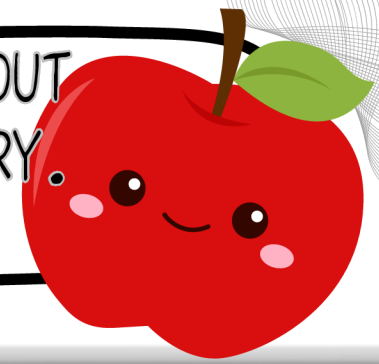

Let's achieve both "business development" and "creation of social value."

Customer success is
Fuji Plant's success.

We are looking for partners based
on this philosophy.

PLEASE LEARN MORE ABOUT
JAPAN'S APPLE INDUSTRY
IT'S A HUGE MARKET.

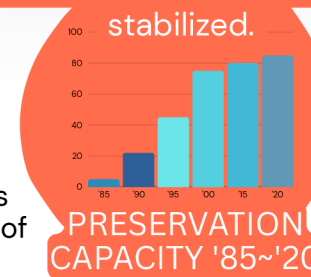

Data of Japanese Apple..

1st
place

**FRUIT EXPORT VOLUME
2024 MINISTRY OF
AGRICULTURE**

Forestry and Fisheries Statistics
estimate: Apples account for 1/3 of
all fruit in Japan.

With the spread of long-term
preservation technology, the
market has grown rapidly and
stabilized.

**PRESERVATION
CAPACITY '85~'20**

1st
place

**NO. 1 FRUIT EXPORT
VOLUME 2024 MINISTRY OF
AGRICULTURE**

Forestry and Fisheries:
Apples are the most
exported.

Building a preservation and transportation system that
can ensure a stable year-round supply of fruits and
vegetables, which have a limited harvest season, will
greatly contribute to economic development.

We hold over 80% of the market share for CA apple preservation.

The growth of Japan's apple industry is largely due to the
spread of preservation technologies that make year-round
distribution possible.

Long-term preservation technologies can be a powerful
tool for bringing growth, stability, and social value to the
fresh food industry.
